## Iowa Lakes REGIONAL WATER

Iowa Lakes Regional Water is a member-owned, regional government utility organization that was originally founded nearly 50 years ago through local farmers like you and your neighbors.

### Our Mission :

Serve as a regional utility providing safe, reliable, and economical water and wastewater services to Northwest Iowa and Southwest Minnesota.

### Our Vision :

Strive for excellence in the products and services delivered to our current and future customers while enhancing the quality of life through innovation, dedication, and integrity

### Our Values :

Safety, Integrity, Reliability,  
Communication & Economical

# IOWA LAKES REGIONAL WATER

# Quality Water SIGN-UP OPPORTUNITY

## Northwest Iowa Residents, Businesses & Farming Community

### ACCEPTING NEW SIGN-UPS!

Clean water is the most vital resource to our health, community and economy, often taken for granted. Let our experts ensure your family has only the best water every day. Our staff is dedicated to serving you and your family with high quality, safe, reliable, great tasting water while providing you exceptional service you will appreciate. Consider rural water now to avoid the increasing Northwest Iowa drought conditions and contamination challenges!

Often, customers ask us about the need for a water softener. Each day we perform water quality testing and maintain 6 to 8 grains of hardness, saving you in-home treatment expenses. Even though the majority of our customers do not use a water softener, we ultimately leave the decision to the customer for their preference.

We are always accepting new customers in our growing service area as we expand into unserved and underserved rural areas. Call our project development team in advance to check eligibility to serve you, cost for an excellent product with great service, and the timeline for installation.

### WATER IS Essential :

- Provides nourishment
- Rids body of toxins
- Improves & maintains sanitation
- Wildlife & plant survival
- Prevents diseases
- Agriculture & food production
- Protects public health & hygiene
- Protects the environment

Contact your County Environmental Health Department to Test your Well Source Water  
CDC Recommends testing your private well(s) at least every year and check each Spring for mechanical problems.  
Avoid a winter without access to a water source for your family and animals, ILRW is here for you!

## Reap the Benefits OF BEING AN ILRW MEMBER
